Experiment Report: Fig2

Automated experiment report

2025-02-28

Introduction

This document presents the results for the experiment in this folder. Below are the figures generated during the analysis.

Figures

Figure 1: Positive Co-occurrences

Figure 1 shows the number of positive co-occurrences that were determined for all treatments. We also show the numbers of matches these co-occurrences had with either interactions (orange) and/or environmental preference similarity (green).

Figure 2 shows the same results just for negative co-occurrences.

Figure 1: Positive co-occurrences

plot_match_allruns_eucintn

Scenarios — c1, c2, s1, s2, s3, s4, s5

Negative associations

Association matches:
Rest
Resource pref. similarity
Resource pref. similarity and interactions
Interactions

Figure 2: Negative co-occurrences
